```

The diagram illustrates the LLM Prompt Template and the two-step analysis process.

LLM Prompt Template:

- Target Event:** COVID-19
- Item 1A** and **Item 7**
- Ticker & Filing Date**
- Few-shot Example**
- Chain-of-Thought Prompts**
- Time Decay Principle**

Step 1: Holistic Analysis

The LLM Prompt Template leads to Step 1: Holistic Analysis. In this step, the LLM (represented by a robot icon) asks: "Hmm... did the company mention this event?" and "Let me look for any concrete impacts!". The output is a **Risk Summary:** "The filing details concrete historical impacts, such as.....".

Step 2: Micro-Scorecard

Step 1 leads to Step 2: Micro-Scorecard. This step involves a hierarchical scoring process:

- Level 1 Item Score:** Item 1A and Item 7.
- Level 2 Snippet Score:** Snippet 1, Snippet 2, ..., Snippet N.
- Level 3 Component Score:** Reason 1, Reason 2, ..., Reason N.

The scores are calculated as follows:

- Item 1A:** Snippet 1 (+5), Snippet 2 (+4), ..., Snippet N (-1).
- Item 7:** Snippet 1 (-3), Snippet 2 (-2), ..., Snippet N (-1).

The final output is a **Risk Summary:** "The filing details concrete historical impacts, such as.....".

```

```

Structured Score Tables

Multi-Scored Tables:

Quantified Metrics

1. Total Impact / Response Score.
(Σ item 1a / 7 snippet scores)
2. Average Severity Score
3. Auditable Evidence Trail with Micro-Scorecards
4.
